

## Parking Rules and Regulations

### 10. Pick-up/Drop-off bay:

Pick-up and drop-off points provided near public transport nodes are meant to facilitate immediate pick up and drop off. Hence, motorists should not wait at these bays, as this will cause unnecessary obstruction to other motorists picking up or alighting their passengers.

### Identifying a CCTV Monitoring Zone

LTA has painted lamp posts and sign posts within CCTV monitoring zones with bright orange vertical strips. In tandem, “No Waiting” signs at passenger pick-up points with CCTV cameras are installed to remind motorists that they are not allowed to wait at these pick-up locations other than immediate boarding and alighting of passengers.
